TOP FIVE BRAKE COMPONENTS CITED FOR OUT-OF-SERVICE VIOLATIONS

1. Automatic Slack Adjuster
2. Brake Shoe/Lining
3. Brake Drum
4. Cam Shaft
5. Brake Chamber & Bracket

Do you have room for improvement when it comes to the routine inspection of these components?

Improved inspections can result in increased uptime and create opportunities for additional revenue based on increased repairs.

Would your truck pass a roadside inspection?

According to the Commercial Vehicle Safety Alliance (CVSA), Brake-related violations comprise the largest percentage of all out-of-service violations cited during roadside inspections.

Improperly installed or poorly maintained brake systems can reduce the braking capacity and stopping distance of trucks and buses, which poses a serious risk to driver and public safety.

DELAYING A \$25 BRAKE JOB COULD COST A FLEET \$400 IN REVENUE.

WORTH IT?

WE DON'T THINK SO.
