

ROAD CHOICE DIESEL PARTICULATE FILTERS & AFTERTREATMENT COMPONENTS

Diesel Particulate Filters are an important part of your truck's Exhaust Aftertreatment System. These filters trap and remove soot from diesel engine exhaust to reduce air pollution, preventing harmful black smoke and improving air quality by converting soot into ash. This is a crucial emission control device and essential for your truck's EPA compliance.

Road Choice DPFs fit and function like original equipment and are the only OE-approved alternative. These filters are not produced with RCF fibers, a suspected carcinogen, like several aftermarket filters. Road Choice DPF products are available through the PDC and can be ordered via Parts LinQ or using the LPA program.

ROAD CHOICE PART NUMBER	DESCRIPTION	CONTAINS CLAMPS & GASKETS	APPLICATION	YEAR
DPF2010P	DPF 2-Box Service Kit	No	Volvo/Mack Heavy Duty 11L, 13L, 16L Engines	2010+
DPF2016P	DPF 1-Box Service Kit Includes DPF filter, clamps & gaskets	Yes	Volvo/Mack DPF 1-Box	2016+
DOC2010P	2-Box DOC	No	Volvo/Mack Heavy Duty 11L, 13L, 16L Engines	2010+
