

ROAD CHOICE DEF PROGRAM

Road Choice Diesel Exhaust Fluid (DEF) offers the highest quality DEF in 2.5 gallon jugs, 55 gallon drums, 330 gallon totes or Bulk Fill (5,200 gallons) from production and distribution facilities all over the country.

Road Choice DEF and DEF Equipment conforms to the ISO-22241 specification for DEF, is API registered and meets or exceeds OEM specifications.

HANDLING AND STORAGE

The shelf life of DEF is directly related to the temperature at which it is stored. Failure to store below 86°F (30°C) may significantly reduce shelf life and effectiveness of product. If DEF freezes, its efficacy will not be effected upon thawing. To maintain the purity of DEF and not harm the SCR Catalyst System care must be taken regarding the material of construction for all items that come in contact with the DEF solution. Included from the ISO-22241-1 standards are the recommended and not recommended materials for contact with DEF.

ROAD CHOICE DEF TOTE PROGRAM

Road Choice Totes are fully equipped with a valve and down tube. Pricing for a 330 gallon tote (DEF330P) includes the cost of the tote container and 330 gallons of Diesel Exhaust Fluid, there is no additional charge or core fee for these products. After the initial purchase of a 330 gallon tote, totes can be refilled using the Tote Refill Part Number (DEF030FX) Road Choice DEF distributor assigned to your corresponding territory.
